

PROJECT PROFILE

PROJECT:

Walker Center Parking Structure
Salt Lake City

COMPLETION DATE:

Fall 2004

PROPERTY MANAGER:

Pinnacle
Salt Lake City

Facility:

The Walker Center Parking Structure is a 10 level facility located in downtown Salt Lake.

Problem:

The structure's traffic coating was losing the non-slip finish on the lower-level ramps.

Solution:

CRS cleaned the ramps and over-coated them with fresh urethane traffic coating. CRS completed this project during a weekend shutdown and returned the structure to full operation Monday morning.

TOP: Weekend closure for repairs. CENTER/BOTTOM: Views of completed traffic coating.
